-- REVOLUTIONARY MEDICAL TREATMENT--

EBOO

O3 Therapy

A Revolutionary Approach
to Health and Wellness

EBOOflow

What’s EBOO?

EBOO stands for **E**xtracorporeal **B**lood **O**xygenation and **O**zonation, a unique form of ozone therapy that involves the treatment of blood outside the body using ozone gas, ultraviolet (UV) light, and a filtration system. The process is known for its detoxifying and healing properties.

It can help rejuvenate the body’s cells, improve oxygen levels, and enhance circulation. The ozone therapy machine used in this procedure helps introduce medical-grade ozone (O3) into the bloodstream. Which then interacts with various cells and tissues to promote healing.

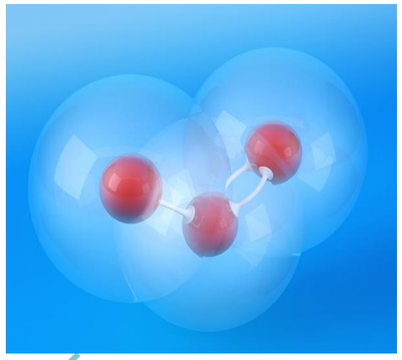
The addition of UV light further enhances the therapeutic effect by improving blood circulation and activating immune cells to fight infections and diseases.

EBOO Process

01

Blood Collection

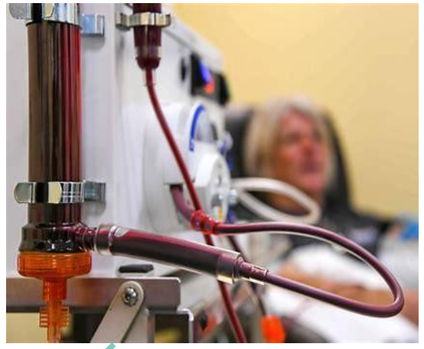
Blood is drawn from the patient’s body.



02

Ozone Treatment

Blood passed through the EBOO machine, which infuses the blood with O3 gas. The ozone interacts with the blood and tissues, activating an oxygen-rich environment that promotes healing.



03

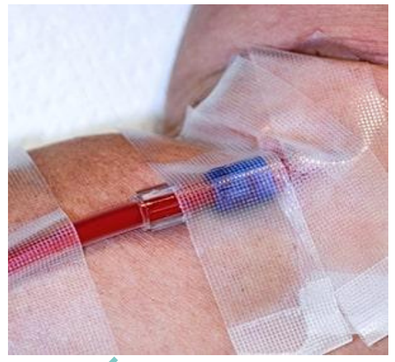
Filtration

The blood is passed through a filtration system that removes impurities, toxins, and waste products.Which are then eliminated from the body.

04

UV Light Exposure

The blood is exposed to UV light during its return to the body. This enhances the effects of ozone, boosts immune function, and helps in the overall detoxification process.



05

Re-infusion

The treated blood is then returned to the patient’s body, with the enriched blood supporting the body’s healing and immune system.

Treatable Diseases

Chronic Fatigue Syndrome

Fibromyalgia

Autoimmune Disorders

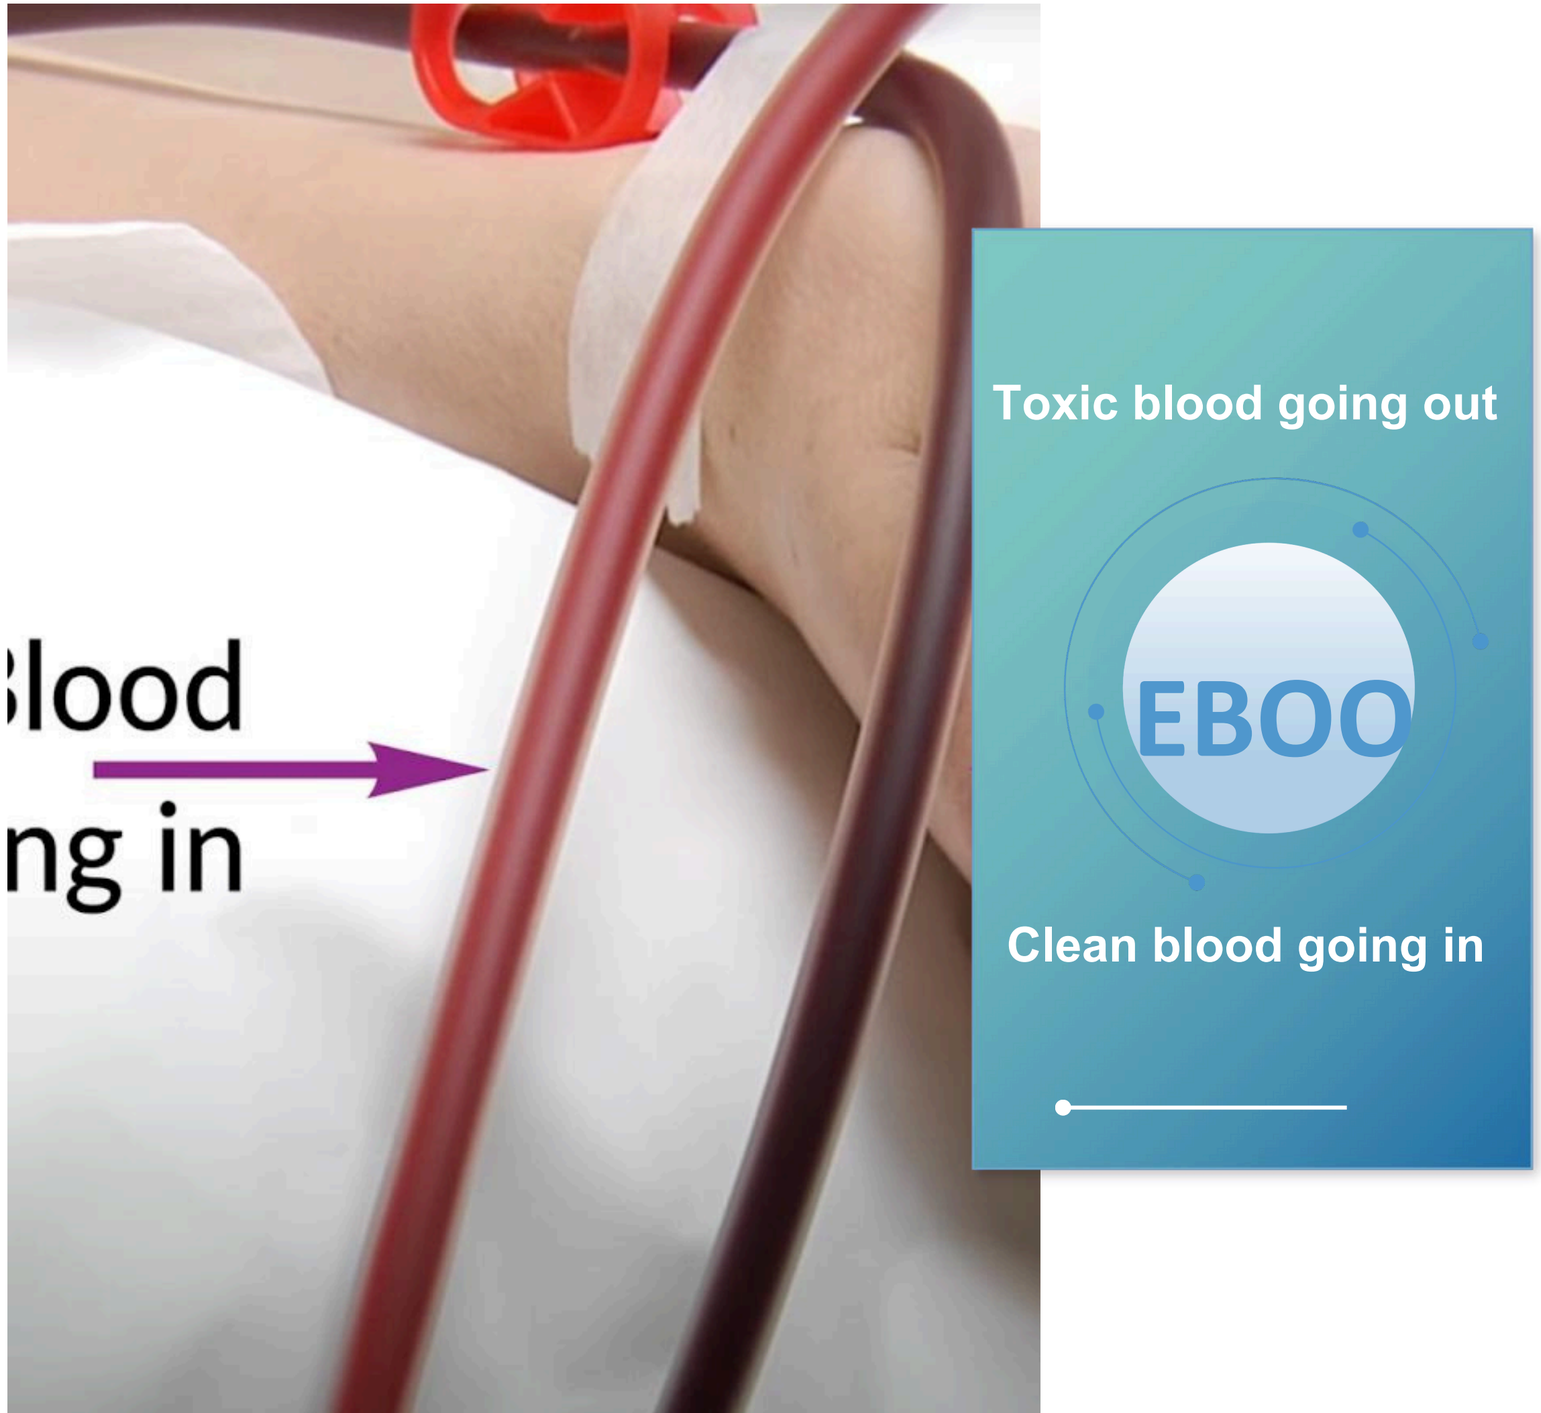
Chronic Infections

Neurological Disorders

Cardiovascular Diseases

Respiratory Diseases

Cancer



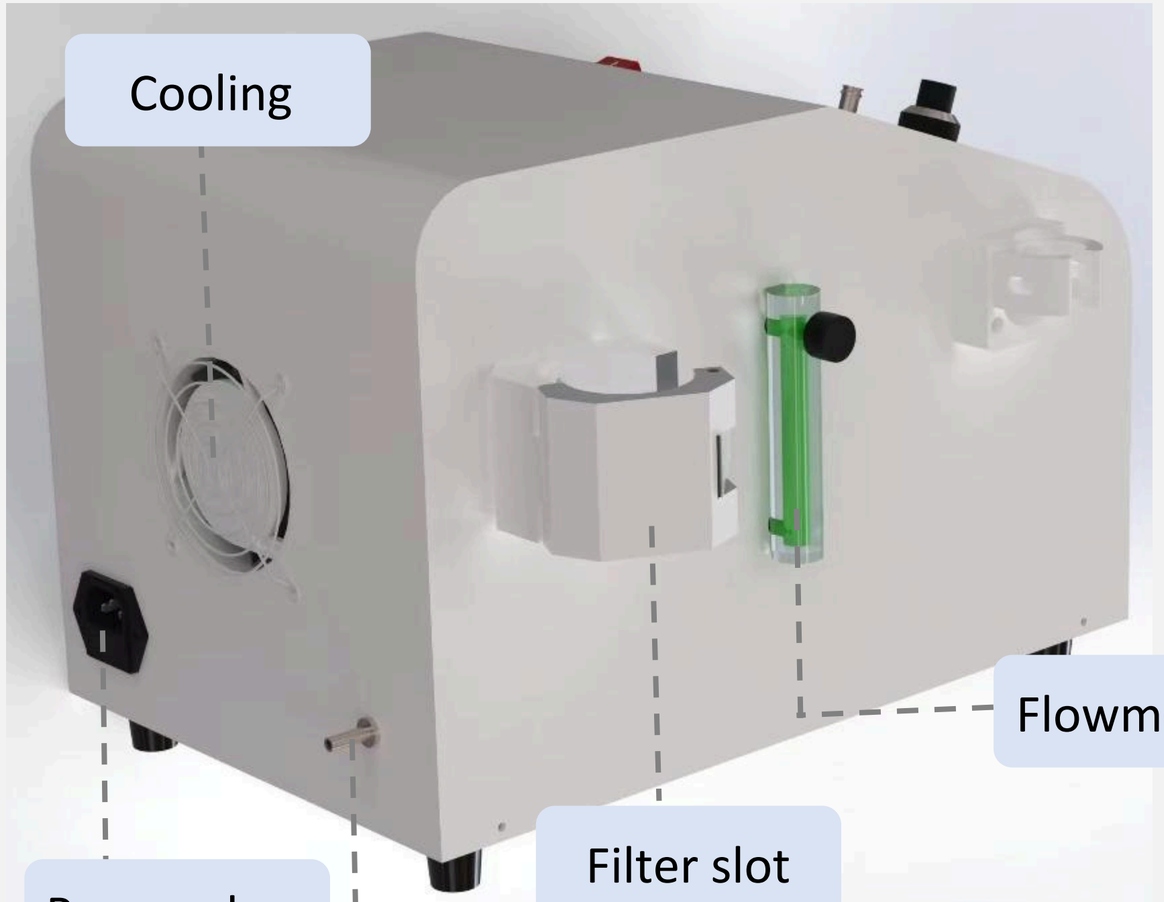
Production Information

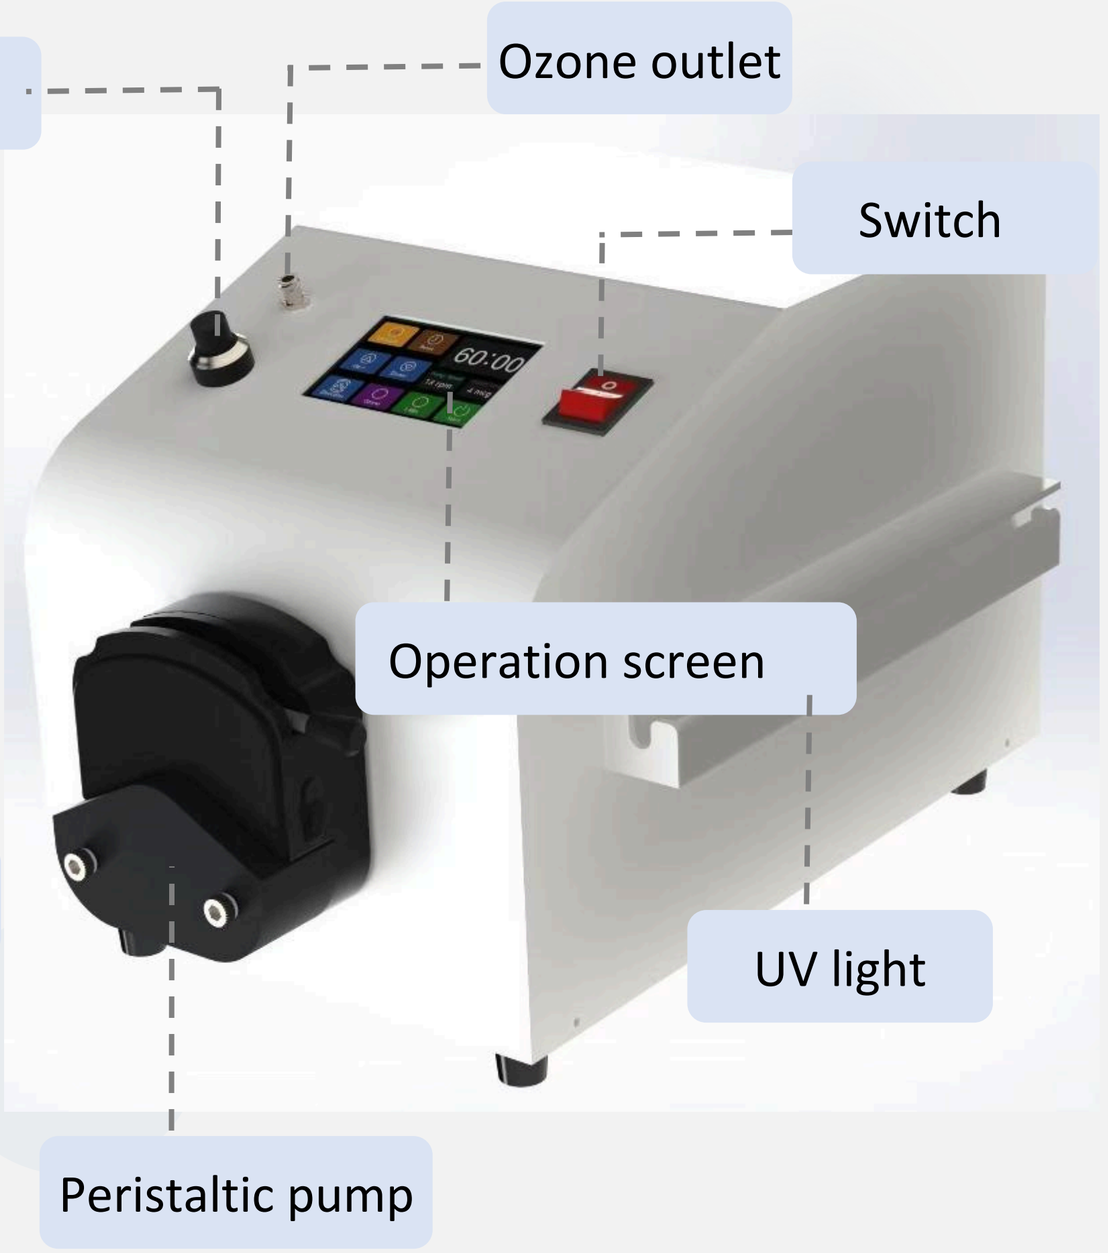
EBOOflow

This EBOO Machine is a compact, lightweight, and user friendly device. This is the first device equipped with touch screen LCD display that provides clear and concise information about the treatment process. The touch screen interface is easy to use and allows for precise control of the treatment parameters.Just a few taps on the screen to finish the setting , more advanced than the other mechanical setting EBOO products in the market now. One machine built-in all the functions you need.Moreover, smart features in our system to ensure the safety issue during treatment.

Our EBOO machine mainly has the following functions:
nOzone function
nTimer funtion
nPeristaltic pump
nUltraviolet light (UV)
n flowmeter
nBlood level sensing function
nTemperature sensing function

Product Detail





Product Specification

Model Number	EBOOFLOW G1
Ozone Concentration Range	1-100 ug.ml adjustable
Oxygen Flow Feed	1 LPM
UVBI	UVA+UVC
Pump Speed	13-99 RPM adjustable
Flowmeter	0.1-1.5LPM
Product Size	220*330*220mm
Voltage	100-240 VAC
Weight	7kg

在这里我很荣幸赶上了公司改革的机遇，面对了一个挑战自我的时机。感谢公司领导为我们创造了[illegible]会。我非常自豪地看到我们公司改革前进的步伐，以这种公平、公正、公开的方式选拔优秀的企业人才。

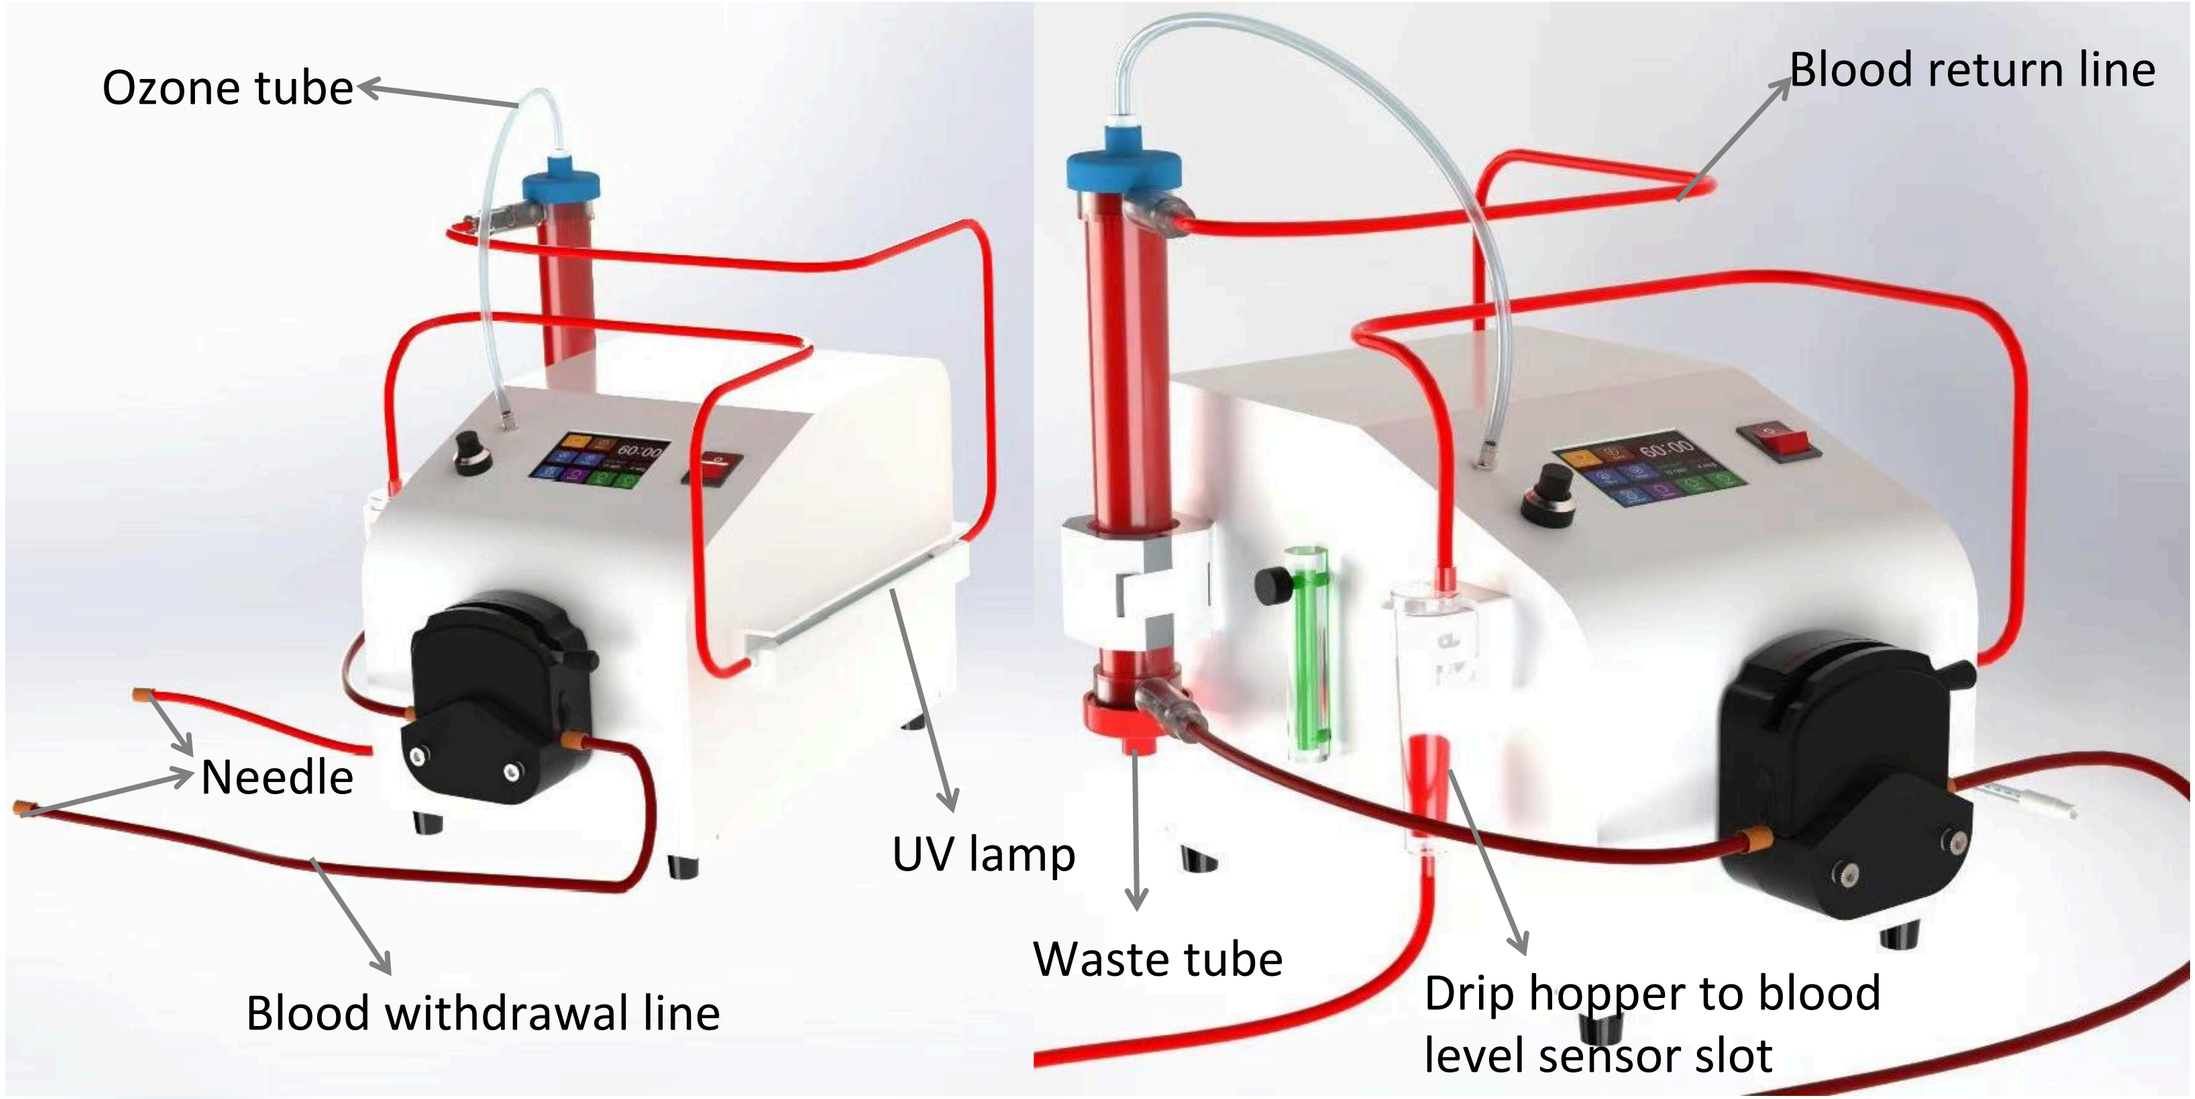
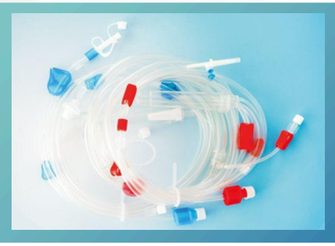
System Connection



Disposable Accessories

Tubing

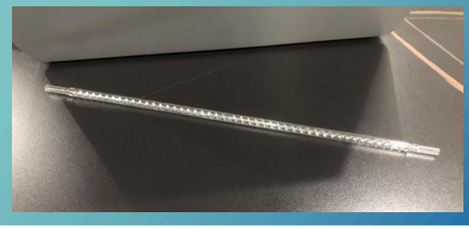


- Ozone tube
- Waste tube
- Blood out tube
- Blood in tube

Filter

- High efficiency filtration
- Dry version
- Sterilized package
- Polyethersulfone

Cuvette



- Pure quartz material
- Improve purification
- Sterilized package
- 12’’long

Canister

- 1L volume
- ABS+PP
- 127*190mm
- ISO13485
